

# **Global Water Footprint Standard Training**

**23 - 24 November 2016**

**International Water House**

**Bezuidenhoutseweg 2, 2594 AV, The Hague, The Netherlands**

**Delivered by the [Water Footprint Network](#)**

**Early-bird discount: 28 October 2016**

**Deadline for registration: 18 November 2016**

The **Global Water Footprint Standard Training** course provides skills and practical advice on how to use and apply all aspects of the Water Footprint Network's water resource accounting tool, the Water Footprint Assessment, in order to develop a water sustainability strategy or public sector policy.

Participants will learn about the latest innovations in water footprint research and application. You will gain experience in using Water Footprint Assessment in a range of applications, from calculating the water footprint of agriculture, industry or domestic water use at all scales, to assessing its sustainability. You will find out how to use these results to identify the priority strategic actions for companies, governments, non-profit organisations and individuals. Case studies will be used as examples to support the implementation of a detailed Water Footprint Assessment.

The course is suitable for all levels of expertise, from those new to the issue to experts in the field of water and environmental resources management.

Upon successful completion of the course, participants will receive the **Certificate of Global Water Footprint Standard Training**, endorsed by the Water Footprint Network.

**Training materials will be provided and are included in the course fee:**

- The Water Footprint Assessment Manual: Setting the Global Standard [English]
- Relevant materials used in the interactive sessions
- All power point presentations used in the training

**Registration:**

Please register by returning the enclosed Registration Form before **18 November 2016**.
